Learning Python

How to use Jupyter Notebook

I am learning basics

1- My first program 2- My 2nd program

In [1]:
```python
print(2+3)
print("Hello World")
print("I am learning Python")
print(5*9)
print(8/2)
```

```
5
Hello World
I am learning Python
45
4.0
```

In [2]:
```python
name=input("What is your name? ")
age=input("What is your age? ")
greetings= "Hello!"

print(greetings,name,)
```

```
What is your name? Asim
What is your age? 23
Hello! Asim
```

In [3]:
```python
req_age_at_school = 10
student_age = input("What's your age son! ")
student_age = int(student_age)

if student_age == req_age_at_school:
    print("You are eligible")
elif student_age > req_age_at_school:
    print("You should join higher school")
elif student_age < req_age_at_school:
    print ("You are not eligible")
```

```
What's your age son! 24
You should join higher school
```

In [4]:
```python
def future_age(age):
    new_age=age +20
    return new_age
    print(new_age)

future_predicted_age= future_age(45)
print("Your predicted age is", future_predicted_age)
```

```
Your predicted age is 65
```
